

**Affiliation No. 1130703**

**WORKSHEET-2**

**NAME:** \_\_\_\_\_

**DATE :** \_\_\_\_\_

**CLASS: VIII DIVISION:** \_\_\_\_\_

**SUBJECT: Science**

**PREPARED BY: Prathibha Hebbar**

**LESSON: 2- MICROORGANISMS- Friends or foe?**

**Q.1 Multiple choice questions.**

**1. Process by which Yeast produces Carbon dioxide during baking**

- a) Fermentation
- b) Oxidation
- c) Preservation
- d) Vaccine

**2. Alcohol from sugar is produced by**

- a) Rhizobium b) Plasmodium c) Lactobacillus d) yeast

**3. Disease causing microorganisms are called**

- a) Antibiotics b) Vaccines c) Pathogens d) Carriers

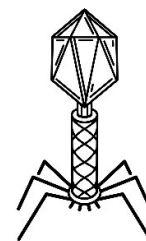

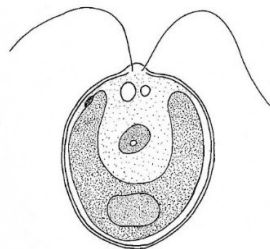

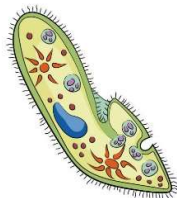

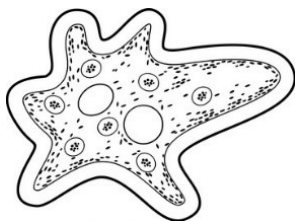

**4. Identify the type of bacteria helps in the process of curdling of milk.**

- a) Lactobacillus
- b) Rhizobium
- c) Vibrio cholerae
- d) Influenza

**Q.2 Answer the following**

1. Which are the various mode of spreading the infectious diseases?
2. Name any 2 non infectious diseases
3. What can be achieved by drinking boiled and filtered water?
4. Why viruses are quite different than other microorganisms
5. How food poisoning happens in our body?

**Q.3 Identify the Microorganism.**

**Subject Tr**

**HOD**

**Co Ordinator**

**Principal**
