Q.1 Convert the following amounts into paise.

a) ₹5806 = 58,600 p

b) ₹ 78.99 = 7,899 p

c) ₹509.23 = 50,923 p

d) ₹ 99.09 = 9909 p

Q.2 Convert the following amounts into rupees.

a) 3456
= $3456 \div 100$
= ₹34.56

b) 1093 p
= $1093 \div 100$
= ₹10.93

c) 3176 p
= $3176 \div 100$
= ₹ 31.76

d) 909 _____
= $909 \div 100$
= ₹ 9.09

Q.3 Priyanka bought the following items from a cosmetic shop on August 2.

- 2 bodywash bottles for ₹355 each
- 3 bottles of shampoo for ₹600 each
- 1 pack of handwash soap for ₹310
- 1 moisturiser bottle for ₹590
- 1 pack of conditioner for ₹1100
- 3 lip balms for ₹100 each

Using the information above make a bill for the purchase.

S. No	Item	Rate (per item)	Quantity	Amount (₹)
1	Bodywash	₹355	2	₹710
2	Shampoo	₹600	3	₹1800
3	Handwash	₹310	1	₹310
4	Moisturiser	₹590	1	₹590
5	Conditioner	₹1100	1	₹1100
6	L.P balms	₹100	3	₹300
Total				₹4,810

Q.4 Work out the following word problems.

Kartikey wants to buy a notebook for ₹145.25 and a pencil for ₹43.25. He has 10 notes of twenty rupees. How many 20-rupee notes should he give to the shopkeeper to buy both the items? How much money will be left with him?

He give all ₹20 notes to buy things and he left with ₹11.50.

Daksh bought a phone case for ₹312.70 and a pair of earphones for ₹617.30. He gave the cashier some money and received ₹70 in change. How much did he give the cashier?

Both items cost = $617.30 + 312.70 = 930$

Money he received = ₹70

$930 + 70 = ₹1000$

He gave ₹1000 to the cashier.
