L .No- 7,Topic : The Tyger

Q.1 Read the following passage and answer the questions given below:

Garbage is a great environment hazard. It comes from various sources—used paper, tiffin packing, plastic bags, ice-cream wrappers, bottle caps, fallen leaves from trees and many more. Garbage makes the premises ugly, unkempt (messy) and breeds diseases. A lot of trash that is thrown away contains material that can be recycled and reused such as paper, metals and glass which can be sent to the nearest recycling centre or disposed of to the junk dealer. It also contains organic matter such as leaves which can enrich soil fertility. A compost pit can be made at a convenient location where the refuse (trash) can be placed with layers of soil and an occasional sprinkling of water. This would help decomposition to make valuable fertilizer. This would also prevent pollution that is usually caused by burning such organic waste.

1) Garbage originates from-

- (a) **Used paper, tiffin, packing, plastic bags and fallen leaves from trees**
- (b) leftovers of food
- (c) Building materials.

2) What happens to the disposed of material at the recycling center?

- (a) It is thrown away
- (b) **it is recycled for reuse**
- (c) It is sold to the rag pickers

3) **Fallen leaves from trees are useful because they –**

- (a) Enrich water quality
- (b) **Enrich soil fertility**
- (c) beautify landscape.

4) Garbage can create havoc to the mankind by-

- a) slowing our vehicles on the road
- (b) **Spreading several diseases**
- (c) all the above.

Q.2 Fill in the blanks with the correct word:

Immortal (b) symmetry (c) furnace(d) anvil(e) aspire

- a. The professor encouraged the medical students to work hard and.....to be and outstanding doctor.
- b. The ancient Egyptian believed that their pharaohs were gods and so were.....
