SUBJECT: English
Literature and Grammar

SECTION-A

Q.1.A Read the following passages and answer the questions below:

Pollution is a major environmental issue that affects the health of our planet and its inhabitants. It occurs when harmful substances are introduced into the natural environment, leading to detrimental effects on ecosystems and human health. The primary types of pollution include air, water, and soil pollution.

Air pollution is often caused by industrial emissions, vehicle exhaust, and the burning of fossil fuels. It can lead to respiratory problems, cardiovascular diseases, and can even affect mental health. Major cities around the world struggle with poor air quality, often resulting in smog and haze that can be harmful to residents.

Water pollution is another critical concern. It occurs when contaminants such as chemicals, waste, and pathogens enter water bodies. This not only affects aquatic life but also poses serious risks to human health, particularly in regions where water treatment facilities are inadequate. Contaminated water can lead to diseases such as cholera and dysentery.

Soil pollution results from the disposal of hazardous waste, agricultural chemicals, and industrial spills. Contaminated soil can harm plant life, reduce agricultural productivity, and contaminate groundwater supplies. The consequences of soil pollution can last for generations, making it essential to address this issue.

Efforts to combat pollution include stricter regulations, promoting clean energy, and encouraging recycling and waste reduction. Public awareness campaigns also play a vital role in educating individuals about the impact of their choices on the environment. Addressing pollution requires collective action to ensure a healthier planet for future generations.

1. What is the primary cause of air pollution?

- (A) Agricultural practices (B) Industrial emissions (C) Natural disasters (D) Wildlife activities

2. Which disease is associated with contaminated water?

- (A) Diabetes (B) Cholera (C) Cancer (D) Hypertension

3. What type of pollution can reduce agricultural productivity?

- (A) Air pollution (B) Water pollution (C) Soil pollution (D) Noise pollution

4. What is one way to combat pollution mentioned in the passage?

- (A) Increasing vehicle use (B) Promoting clean energy (C) Reducing forest areas (D) Ignoring regulations

5. Why is public awareness important in addressing pollution?

- (A) It increases pollution levels. (B) It helps educate individuals about environmental impact. (C) It promotes industrial growth. (D) It discourages recycling efforts.

SECTION- B : GRAMMAR

Q. 2 Do as directed

1. Identify the adverb and its type:
She sings beautifully on stage.
2. Fill in the blank with an appropriate adverb:
The child ran _____ to catch the bus.
3. Rewrite the sentence using the adverb given in brackets:
He spoke (softly).
4. Transform the sentence into one with a negative adverb:
She is always punctual.
5. Choose the correct adverb:
She completed her homework (quick/quickly).
6. Identify the preposition in the sentence:
The book is lying on the table.
