WORKSHEET 3

(PT 1 – TERM 1)

SUBJECT: SST

L.No.3. Physical features of India

Prepared by: Ms. Savita Pagar

1. Read the passage and answer the following questions.

The Himalayas consist of three mountain ranges that run parallel to each other.

1. The Himadri or the greater Himalayas.
2. The Himachal or the middle Himalayas.
3. The Shiwalik or the Outer Himalayas.

The middle Himalayas are lower than the Greater Himalayas. They have many rivers, valleys and passes. These valleys experience heavy rainfall. Many beautiful hill stations such as Shimla, Kullu Manali Mussoorie Ranikhet Nainital and Darjeeling are located in this range. The slopes of the mountains in this range are covered with thick forests of Pine, willow, Oak and deodar trees.

1. Name the three ranges that make up the Himalayas.
2. Write the names of hill stations which are situated in the Himachal.
3. Which trees are mostly found in the Himachal Forest?
4. The _____ are Lower than the _____.

2. Name the following.

1. Barran land with Rocky soil _____
2. Salt marsh found in _____
3. step well or Baolis mostly seen in _____ state
4. A land surrounded by water bodies on three side called _____
5. Port Blair is the capital of _____
