LESSON-5 Life of an Early Man

A. A. Pre Activity: Draw and colour any three types of tools which were used by the early humans.

B. Key Words: 1.evolution 2.emerged 3.historians 4.mammals 5.organisms
6.organic 7.chimpanzee 8.orangutan 9.fossils 10.ape-man 11.shrank 12.
modern man 13.ansector 14.hunter -gatherer 15. flint tool 16.domesticating

C. Fill in the blanks.

- 1) Organic complex forms evolve from simple forms.
- 2) Mammals are warm blooded organisms.
- 3) The Early humans used to live in jungles.
- 4) Large stones were chipped and shaped to make core tools.

D. Write T for True or F for False against each statement.

- | | |
|---|--------------|
| 1) For cultivation of crops, river banks were the best suitable area. | True |
| 2) Today's protect their body, early man wore raincoats. | False |
| 3) Sickle blades were used for cultivation. | True |
| 4) Dinosaurs were domesticated by the early man. | False |

E. Short answer questions.

1) Why was the early man called as hunter -gatherer?

Ans. The early humans were called hunter gatherers because they gathered fruits , nuts seeds and leaves for food also they hunt small animals to eat their raw flesh.

2) What did the early men use to cover their bodies?

Ans. Early men used animal skin and bark of trees to protect their body from heat, cold and wind.

3) Name the food eaten by the early man?

Ans. Plant parts and raw flesh were eaten by the early man.

F. Long answer questions.

1) Differentiate between core tools and flint tools.

Ans.

Core tool	flint tool
Large stones were chipped and shaped to make these tools.	Smaller stones pieces were used to make these tools.
These tools help to cut trees and dig the ground. Eg. choppers and knives	These tools were used to cut the skin of animals and chopped it. Eg. Hand-axes and hammers

2) How did the early man become a food producer?

Ans. The early man became a food producer as they started cultivation and worked as a farmer then they realised that when seeds fell on ground they grew as plants. So, they started growing crops such as wheat Barley and rice.

3) What information about the early man has been found during excavations ?

Ans. During excavations the fossils of the early man were found about the early man indicate that the body features and leaving conditions of early men were similar to those of an ape.

4) Describe the food and shelter of the early man?

Ans. Food- The early humans gathered fruits, nuts, seeds and leaves for food also they ate raw flesh of animals.

Shelter - They lived on trees and in caves. The Shelters protected them from bigger and stronger wild animals, rain, heat and cold weather.

5) Why did the early man settle near the rivers and lakes?

Ans. The early man settled near the rivers and the lakes because of cultivation of crops.

E. Post Activity: Draw any 1 painting of carving on stones during early man.
