

WORKSHEET 1
(PT 1 – TERM 1)

Class -5th

Prepared by: Shreya Bhogal

SUBJECT : Science

L -2 The nervous system

I. Which part of the brain will be used for the following activities?

1. Using our sense of smell while cooking food.

2. Sitting straight while sitting in a yoga pose.

3. Breathing as we jog around a park.

4. Recalling facts learned about our body.

II. Shivam has made notes about the spinal cord which forms an important part of the nervous system. His notes have some errors. Spot these errors and correct them.

The spinal cord, which is surrounded and protected by the ribcage, originates from the cerebellum and extends almost till the lower end of our backbone. It is made up of many muscles. The spinal cord helps in transferring all the information between the sensory organs and the rest of the body.
