SUBJECT: English
LS NO - 9. The Wind and the leaves

Pre -Activity-

Why do leaves change the colour?

Ans: Leaves change colour with the seasons due to a combination of environmental factors and chemical processes within the leaves.

Q.1. Keywords and Word meanings:

1. meadows: Grassy areas
2. fluttering: waving
3. whirling: moving rapidly and round
4. content: satisfied
5. earthy beds: the soil or ground
6. coverlet: a covering like a bedspread

Q.2. Answer the following questions:

(a). The poem is welcoming which season?

Ans: Autumn season

(b) What does the wind want the leaves to do?

Ans: The wind wants leaves to put on their red and golden dresses.

(c). What reason does the wind give for calling them just now?

Ans. The wind gives the reason for calling them just now that summer is gone

(d). Where do you find the leaves at the end of the poem?

Ans: The leaves are in earthy beds at the end of the poem.

(e) What happens to the leaves in different seasons?

Ans: They change their colour and fall according to the season.

(f) When do trees shed their leaves?

Ans: They shed their leaves in the autumn season.

(g) What do you think is the role of wind for a plant/ tree?

Ans: The wind is necessary for all the plants and trees to breathe and for pollination.

Q4. Life skills and values.

Burning of fallen or dry leaves is extremely harmful and cause air pollution. How do you think it will impact people and animal?

Ans The burning of dry leaves may release toxic gases like carbon monoxide which is responsible for causing air pollution. The fumes containing the carbon monoxide can create respiratory disorders. This is the reason why people living near to the farmer were suffering from cough and other breathing problems.

Post activity-

(a). If you think a pile of dry leaves in your garden or in a park, what do you think should be done with the leaves?

Ans : The dry leaves should be composted as it does not give rise to any type of pollution, in fact, act as manure for the plants and trees.
