Started notes in Class on: _____

Prepared by: Ms. Misba B.

Ls no:14 Days of International Importance

A) PRE ACTIVITY.

List a date which is important for you and remember it every year? (eg-Birthday, 1st day of School etc)

B) NEW WORDS.

Diseases, engaged, designated, originated, communicable, individuals, diminish stress, neighbours, literacy, Sustainable

C) SHORT ANSWER QUESTIONS.

1. Why do we need to observe certain days as special?

Ans: Observing special days raises awareness about important global issues and encourages positive action.

2. How do chemical fertilizers make food unhealthy?

Ans: Chemical fertilizers may contain harmful substances that can contaminate crops, leading to health risks when consumed.

D) LONG ANSWER QUESTIONS.

1. Name some of the days of international importance.

Ans: Some internationally important days include World Health Day (April 7), International Women's Day (March 8), International Literacy Day (September 8), and Human Rights Day (December 10). These days promote awareness and action on critical global issues.

2. Why is literacy important?

Ans: Literacy is essential for personal development and societal progress. It empowers individuals, improves employment opportunities, promotes equality, and helps combat poverty. A literate population contributes to better health, education, and overall well-being.

3. Why should we check expiry dates on food packets?

Ans: Expiry dates indicate the safety and quality of food products. Consuming expired food can lead to health risks like food poisoning or reduced nutritional value. Checking dates ensures food is safe to eat.

4. What factors are leading to the reduction of natural resources?

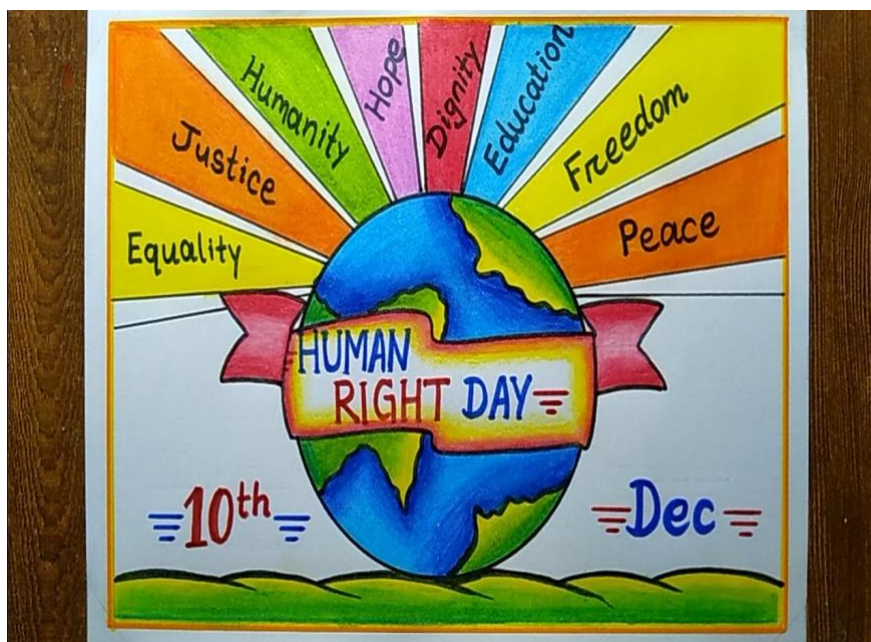

Ans: Overpopulation, deforestation, pollution, overuse of fossil fuels, and unsustainable agricultural practices are leading to the depletion of natural resources like water, forests, and minerals. Industrialization and climate change are also major contributors.

5. How can we contribute on an individual level to solve the problem of an unhygienic environment?

Ans: Individuals can contribute by maintaining personal hygiene, properly disposing of waste, reducing plastic use, recycling, conserving water, and spreading awareness about cleanliness. Supporting local clean-up initiatives and reducing pollution can also help.

E) POST ACTIVITY.

Draw and colour a poster on the slogan of Human Rights Day, December 10
