REVISION WORKSHEET

(TERM 1)

SUBJECT :SST

L.No. 1 TO 7

Prepared by: Ms. Savita Pagar

Q1. Source based question.

Read the passage and answers the following.

Renewable resources like sunlight, water, air, soil, plants, forests and animals will be available forever as they are renewed constantly through natural processes. These resources can be used again and again. Such resources are known as renewable or inexhaustible resources. That is only if we use them wisely and not spoil or pollute them.

The solar energy of the sun is used by plants through photosynthesis to prepare food. It is also used to power appliances, such as solar cookers, solar heaters, solar calculators and solar streetlights.

) 1. what do you mean by renewable resources?
